II. DESCRIPTION OF SERVICES

Through this RFP, the District is seeking to obtain proposals from qualified and experienced persons, organizations, companies or firms to provide the data transport or wide area network services described herein. The District intends to contract with the successful Proposer to provide services and support to the District; services to be provided, related matters, and all related costs must be detailed. The successful Proposer must have experience with E-Rate and utilize the service provider invoice (SPI - Form 474) method of billing the District for services. While subject to final determination, the District expects that the successful Proposer will begin delivery of the Products and/or Services on July 1, 2018 for a term of five years with the option to extend the contract for an additional three years prior to expiration of original contract on June 30, 2021. Other District requirements also include those listed here.

- Services must be installed and operational by July 1, 2018. Billing will only begin once all circuits have been thoroughly tested with approval of results by Rockwood Technology Department designee and are activated.
- Each circuit to customer equipment connection must be a single optical connection compatible with Cisco single mode long reach optics or Cisco SX (multi) mode optics.
- One gigabit optical connections must be compatible with either Cisco one gigabit single mode long reach (LR) optics or Cisco one gigabit SX mode optics
- Ten (10) gigabit optical connections must be compatible with either Cisco 10 gigabit single mode LR optics or Cisco 10 gigabit SX mode optics
- The District uses Multicast traffic to improve network efficiency. Please list any and all restrictions that your service might place on multicast traffic. The majority of our multicast traffic leaves the core site and could be up to 100 mbps of multicast traffic. Remote sites send up to 15 mbps of multicast traffic to the core.
- Solutions must provide quality of service (QoS) mechanisms to reduce jitter and packet loss across the proposed solution.
- All circuits in this RFP response must provide full quoted transport bandwidth for the exclusive use of Rockwood R-VI School District.
- The Proposer must provide a physical and logical network drawing of proposed network.
- The Proposer must offer premise-based fiber connectivity for data transmission (WAN/MAN) services, and not a cloud-only based software-defined data transmission (WAN) service.
- The Proposer must own, manage, and maintain its network infrastructure that includes hub sites, fiber plant, electronic switch and routing equipment, and customer premise equipment. Providers must provide a dedicated Ethernet service, not a shared network. The bandwidth provided must be available 24 x 7 x365.

CURRENT ENVIRONMENT

The District's data transmission / wide area network (WAN) that is eligible for E-Rate funding currently consists of service provider fiber with:

- One gigabit Ethernet connections from the locations to the Technology Department (core site) at Babler Elementary School. These locations are listed in the Appendix, Table 1: Locations with current provider data transmission / WAN service

- Five gigabit connection to the Technology Department (core site) at Babler Elementary School
- Four gigabit connection to Crestview Middle School

The district has eleven (11) locations that connect to the WAN through Rockwood-owned fiber that terminates at a building with the current service provider’s fiber connection. These locations are listed in the Appendix, Table 2: Locations with Rockwood-owned fiber terminating at a “hub” site.

The district also has a ten gigabit point-to-point connection, not eligible for E-Rate funding, used for disaster recovery purposes between the Technology Department (core site) at Babler Elementary School and Crestview Middle School. This connection is posted in a separate RFP at:

PRIMARY WAN CONFIGURATION OPTIONS (E-Rate eligible):

The District is requesting up to four different primary data transmission / WAN proposal options from qualified Proposers. Proposers are not required to propose all options and may choose which to include in their response. Refer to Appendix A: Table 1: Current WAN Locations, Table 2: Rockwood-owned Fiber Locations and Appendix B: Option Pricing.

Increase Bandwidth During Contract Term:

The successful Proposer must include the ability to increase bandwidth at individual, some or all locations on an as needed basis at any point during the contract term. The District and Proposer both understand that E-Rate funding/reimbursement for the increase, if approved, will not be eligible until the following fund year and the District will pay the additional amounts as incurred. Include procedures, time constraints, and costs, both on going and one-time, associated with increasing bandwidth in the designated area for each option within the included Response section.

Option One (1): Bandwidth and buildings with direct data transmission / WAN connections are provided as currently configured with an option to increase as needed in the future. Complete Option One (1) in Appendix B: Option Pricing.

Option Two (2): Provide increased data transmission / WAN bandwidth and connectivity as specified to buildings currently comprising the District’s WAN. Complete Option Two (2) in Appendix B: Option Pricing.

Option Three (3): Provide direct data transmission / WAN connectivity with listed bandwidth to all current WAN connected locations plus directly connect to the locations currently on District owned fiber. Complete Option Three (3) in Appendix B: Option Pricing.

Option Four (4): Provide a data transmission solution that Proposer believes is the most cost-effective, efficient and viable long-term option for the District. Include full details, including any one-time or recurring costs required to plan, implement and maintain this solution. Complete Option Four (4) in Appendix B: Option Pricing.

SERVICE CENTER MONITORING INFORMATION

The District requires the ability to monitor bandwidth utilization, latency and jitter for each site in addition to total bandwidth utilization at the core site. The District also requires the ability to have read-only access to Proposer provided network equipment (switches, routers, etc.) installed on District premises. Response section contains the specific information to provide.
