

**BOARD OF COUNTY COMMISSIONERS  
JACKSON COUNTY, FLORIDA**

Project # 1920-17

**Spring Creek Boardwalk**

**ADDENDUM 2**

Whenever there is a conflict between this addendum and the initial bid documents or plans, the addendum shall take precedence.

Questions & Answers

1. Photo of fishing pier – at the walk thru a discussion was had about the removal of the cypress tree that is leaning into the pier. Is the cypress tree going to be removed or do we have to move the pier?

**The leaning cypress tree is marked for removal.**

2. Photo of the loading pier – the stump look like it can not be removed. Can a section of 2' of the pier be removed so that the boardwalk section can be straighten out and new post be install? Or does the pier need to be demo and constructed as a new section of board walk but moved over?

**A section of this stump has been trimmed out of the way so it can be worked around and returned to pre-storm condition.**

3. Photo of the fish cleaning table – sections of this table have rotted lumber supports under the table. Is this table part of the scope? If so can the top planks be removed and the repairs be done and the top planks be re-used? Or if so does the entire table need to be replaced?

**This repair has already been made by County staff.**
